# Offer customers a taste of the good life...

*Introducing delicious high-quality Kona Iced Coffee in many popular flavors — the easiest way to capture the ever expanding specialized coffee category and grow your coffee business year-round.*

**It's Easy.** Our machines are attractive and efficient using state-of-the-art technology. There are no tubes, no water lines, no fumbling with nozzles and no mixing required. Simply place the product bag right into the machine. It's a totally self-contained system and the bag fits perfectly. The coffee is cooled by the machine, which also comes equipped with a self-defrosting system. All you need is a 110 outlet with a small two amp compressor.

**It's in the Bag.** Kona Iced Coffee is packaged in 6-liter bags, requiring no refrigeration until opening. These shelf-stable bags carry a six-month code from the point of manufacture. The bags also come with our new patented dispensing valve which offers maximum quality protection and an exclusive patented disposable nozzle system for easy installation and clean-up.

**It's Exclusive.** Kona Iced Coffee is the only bulk bag-in-a-box, premixed Iced Coffee on the market. And you can count on Kona quality to deliver a fresh, chilled premixed Iced Coffee for your customers' everyday enjoyment. This is an easy and efficient way to compete against the Starbucks and Dunkin' Donuts Iced Coffee products.

**It Saves You Money.** Best of all, there are no equipment costs ever—and no maintenance expenses. Plus, our bag-in-a-box products are competitively priced, giving you many options on profit margins.

**Start something cool with Kona Iced Coffee. Ask about our bulk program and watch your profits soar! Call GoodWest 1-800-948-1922.**

**Available in two convenient sizes and many popular flavors!**

## Kona Iced Coffee Unit Specifications

### Three-Port Model
